

Domino SP Seal

**MEGA FORTRIS
NEW ZEALAND**

The Domino SP is a uniquely tamper-evident strap seal that is accepted by US and UK Customs.

Inside the locking chamber, the strap can still move slightly when the Domino SP is sealed, enabling inspectors to detect gluing easily. Standard markings can include serial number, customer name/logo. A variation of bar codes can also be etched on with laser technology.

Typical applications include trucks and tankers, customs control, airline cargo, empty shipping containers, rail wagons and warehouses.

FEATURES

- 1 Colour coding through different coloured caps and base of seals.
- 2 Domino SP seals are etched with permanent laser marking. Laser marking offers the highest level of security as it cannot be removed and replaced.
- 3 Domino SP is a metal strap seal that has the marking etched on a corrosion proof plastic surface. The marking therefore stays clear and legible even after long-term applications.
- 4 Heat staking is deployed to permanently bond caps and seals.
- 5 Alignment holes ensure easy inspection of proper deployment.
- 6 The strong and durable metal strap can withstand harsh handling and the climatic elements in a long-haul shipment.

SPECIFICATIONS

Material	Polypropylene – with tin-plated metal strap
Locking Length	220 mm
Strap Dimensions	• 9.0mm x 0.28mm • 7.0mm x 0.28mm
Pull Strength	72 - 82KG
Marking Area	16 x 41
Marking Digits	10
Standard Colours	Red, Blue
