

Klicker 2K Seal

ISO17712:2013 Compliant & NZ Customs SEP Approved

MEGA FORTRIS
NEW ZEALAND

The NZ Customs approved Klicker 2K Seal is a world first with a unique dual-colour design making it extremely difficult to clone.

Unlike the majority of bolt seals, the Klicker 2K bush is made of an all metal high-strength steel construction. The clip locking mechanism is embedded in a groove in the metal bush, making the seals stronger and more difficult to tamper.

Typical applications of the Klicker 2K Seal include shipping and intermodal containers, and it's also widely used for ground transportation.

FEATURES

- 1 High-strength steel pin and bush for added security
- 2 Anti-spin locking mechanism prevents friction attack. One-way locking and more difficult to spin.
- 3 The pin and bush are both moulded with ABS to provide high tamper-evident properties and space for laser marking.
- 4 The special high-resilient ABS material does not break easily but will clearly show evidence of tampering.
- 5 The Klicker 2K Seals are etched with permanent laser marking. Laser marking offers the highest level of security as it cannot be removed and replaced. Identical sequential numbers on both parts provide greater security as it prevents parts substitution or replacement.
- 6 The two parts of the Klicker 2K Bolt Seal are joined together for easy handling.

SPECIFICATIONS

Material	High-impact Polypropylene & Hardened Steel
Locking Length	52mm
Pin Diameter	7mm
Pull Strength	>1000kg
Marking Area	Pin: 5mm x 12mm / Barrel: 10mm x 24mm
Marking Digits	Serial Number: 8 Barcode: 8
Carton Quantity	250
Dimensions	505mm x 360mm x 200mm
Weight (kg/ctn)	17.2kg
Volume (m ³ /ctn)	0.024
Standard Colours	Red
