

# Mini Fast Seal

**MEGA FORTRIS  
NEW ZEALAND**

The Mini Fast Seal is a smooth pull and versatile, indicative security seal with metal locking mechanism.

The MFS has a pull break strength of over 10kgs making it surprisingly strong for its size.

Suitable applications include cassettes for ATM machines, money boxes and catering trolleys for pharmacies and hospitals.

## FEATURES

- 1 The Mini Fast Seals are etched with permanent laser marking. Laser marking offers the highest level of security as it cannot be removed and replaced.
- 2 Heat staking technology is used to permanently fix the colour coded cap to the Mini Fast Seal body. Heat staking is too strong to be cut or forced open without leaving clear evidence of tampering.
- 3 The metal locking clip provides added security and strength to the seal.
- 4 Colour coding is made possible by having a variety of our standard colour seals with white based caps.

## SPECIFICATIONS
